

ARÊTE

10x Series

The new 10x Series comes with Multi-Layer Tech Fabric and a precision crafted all metal construction. An ultra-thin 10mm bezel absorbs light spill and imports contemporary looks to your interiors.

Mindful innovation for Home Cinema.

ARÊTE

Multi-Layer Tech

10x Series fabric flaunts the latest Multi-Layer Tech, giving it excellent Light Diffusion properties. Across multiple layers, ambient light is absorbed while projected light is reflected resulting in superior picture quality.

ULTRA HD
4K

4K Resolution

10x Series fabric has the finest grit we have achieved till date. Fit for resolutions from 1080p to 4k and beyond.

Colour and Contrast

Half the drama is colour and light. 10x Series gets first-rate performance out of your projector with its superior fidelity.

Accu White
Gain 1.1

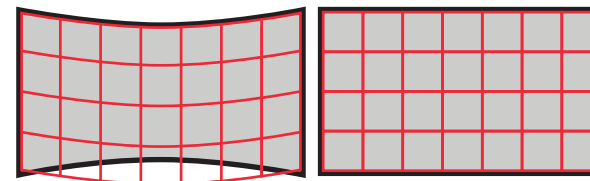

Pro Grey
Gain 0.8

ARÊTE

Flat not Curved

10x Series is flat to address the distortion problem in conventional curved design. Boxes stay boxes. Curves stay curves.

No Hotspots

Multi-Layer Tech delivers even brightness all across the screen area so that you don't see those nagging hotspots.

ARÊTE

Integrated Back Light

A backlight to upgrade your ambience. Choose your favourite colour with a convenient feather-touch remote. Thoughtfully based on RF technology so that you can shoot without being in the direct line of sight.
